William Steuteville (3WH14)
U.S. EPA Region III
841 Chestnut Building
Philadelphia, PA 19107

Dear Mr. Steuteville:

This is in response to the recently submitted "Site Work Plan, Assessment of Drum Disposal Areas, Hunterstown Road Site". I have not had the time to do a detailed review of the work plan, but I have completed a preliminary review.

Technical Comments:

- * Some of the waste and soil samples should be analyzed for the complete Hazardous Substance List. This will provide the data needed to assure that the cleanup plan for the removal action will be consistent with the final remedial action.
- * Drums which are excavated during the test pit procedure should be overpacked and staged in a secure area pending disposal during the actual removal action. Drums which may contain RCRA hazardous wastes should not be reburied after they are have been excavated.

George Mehaffie will be the new DER project officer for this site and the other two Westinghouse NPL sites in the Gettysburg area. George works for the DER Superfund program but his office is located at the Harrisburg Regional Office (One Ararat Blvd., Harrisburg, PA 17901; 717-657-4588) Please direct future contacts regarding removal actions at these sites to George's attention.

Sincerely,

David R. Crownover
